DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 5-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification does not teach how to obtain sub-monolayer islands separated from one another and located in a common plane perpendicular to a growth direction. Applicant notes on the first page of the remarks of 23 January 2006 that the islands emerge on their own, with deposition of fractional monolayer coverage of ZnTe on a closed layer of ZnSe. Applicant then states on the second page of the remarks that the deposition with fractional monolayer coverage in the Oiu invention of 12, column 13, lines 34-65, would not give rise to separate islands, even though the materials are the same as in Applicant's invention. The statements seem contradictory. If the islands emerge on their own in Applicant's invention, then they would emerge on their own in the Oiu layers as well. If the islands do not emerge on their own, simply with fractional layer deposition, then some teaching is necessary to explain how to obtain the separated islands.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 5-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oiu et al.

See reasons of record in the Office action of 19 July 2005.

As noted above, the fractional monolayer deposition as taught in the Oiu reference would appear to inherently give rise to the same structure as in Applicant's invention, if the layer materials are the same, because the same lattice mismatch relied upon by Applicant to form multiple islands as recited would be occurring in the Oiu layers as well, because the materials are the same.
